

## Backgrounds Emmet cheat sheet

|                     |         |                                      |
|---------------------|---------|--------------------------------------|
| background          | bg      | background:#000;                     |
|                     | bg+     | background:#fff url() 0 0 no-repeat; |
|                     | bg:n    | background:none;                     |
| background-color    | bgc     | background-color:#fff;               |
|                     | bgc:t   | background-color:transparent;        |
| background-image    | bgi     | background-image:url();              |
|                     | bgi:n   | background-image:none;               |
| background-repeat   | bgr     | background-repeat::                  |
|                     | bgr:n   | background-repeat:no-repeat;         |
|                     | bgr:x   | background-repeat:repeat-x;          |
|                     | bgr:y   | background-repeat:repeat-y;          |
|                     | bgr:sp  | background-repeat:space;             |
|                     | bgr:rd  | background-repeat:round;             |
| background-position | bgp     | background-position:0 0;             |
|                     | bgpx    | background-position-x::              |
|                     | bgpy    | background-position-y::              |
| background-origin   | bgo     | background-origin::                  |
|                     | bgo:pb  | background-origin:padding-box;       |
|                     | bgo:bb  | background-origin:border-box;        |
|                     | bgo:cb  | background-origin:content-box;       |
| background-size     | bgsz    | background-size::                    |
|                     | bgsz:a  | background-size:auto;                |
|                     | bgsz:ct | background-size:contain;             |
|                     | bgsz:cv | background-size:cover;               |

# Gradients

**linear-gradient**(to **direction** , colors-stop)

**radial-gradient**(shape or **size** at **position**, colors-stop)

**conic-gradient**(from **angle** at **position**, colors-stop)

| Parameter  | Units                                | Example                                                                  | Gradient       |
|------------|--------------------------------------|--------------------------------------------------------------------------|----------------|
| direction  | <b>to</b> + keywords                 | to left, to top right                                                    | Linear         |
|            | <b>to</b> + <b>deg</b>               | to 45deg                                                                 |                |
| position   | <b>at</b> + keywords                 | at center, at top left                                                   | Radial, Conic  |
|            | <b>at</b> + px                       | at 40px 40px                                                             |                |
|            | <b>at</b> + %                        | at 0% 25%                                                                |                |
| angle      | <b>from</b> + deg                    | from 0deg                                                                | Conic          |
| shape      | circle, ellipse                      |                                                                          | Radial         |
| size       | px, %                                | 70px, 80%                                                                | Radial         |
|            | The gradient's ending shape touches: |                                                                          |                |
|            | closest-side                         | the side of the container that is closest to the gradient's center.      |                |
|            | farthest-side                        | the side of the container that is farthest from the gradient's center.   |                |
|            | closest-corner                       | the corner of the container that is closest to the gradient's center.    |                |
|            | farthest-corner                      | the corner of the container that is farthest from the gradient's center. |                |
| color-stop | keyword, hex, rgb +                  |                                                                          |                |
|            | color stop in %                      | red, yellow 50%, #A100FFFF 0%                                            | Linear, Radial |
|            | color stop in <b>deg</b>             | red 0deg                                                                 | Conic          |
